

About

- An alternative strategy designed to help investors mitigate stock market downturns while participating in growth.
- Seeks to generate absolute returns with low correlation to broad stock and bond markets.
- Rotates tactically between Treasuries and Equities using historically proven leading indicators to volatility.

Overview

The ATAC Rotation Mutual Fund is managed by Tidal Investments, LLC, an independent registered investment advisor. The strategy was developed by Portfolio Manager Michael A. Gayed, CFA.

The Funds rotate offensively or defensively based on historically proven leading indicators of volatility, with the goal of taking less risk at the right time.

Investment Process

- 1 Analyze. Do conditions favor higher or lower stock market.
- 2 Rotate. Higher volatility: rotate into Treasuries. Lower volatility: rotate into Equities.
- 3 Evaluate. Weekly for potential changes.

Commentary

The first quarter of 2025 finally featured the conditions that work in favor of risk rotation strategies. In particular, March saw the return of volatility and, more importantly, the return of Treasuries as a risk-off asset. The ability to successfully add and reduce portfolio risk based on market signals allowed the fund to beat the S&P 500 by more than 6% for the quarter. We were very pleased that investors in the fund were able to enjoy market-beating returns while simultaneously manage portfolio risk in the process.

We feel that investors will need to keep being mindful of the many risks still facing the markets. The uncertainty of tariffs have sucked the oxygen out of the room and, while they're unquestionably a potential downside catalyst moving forward, we see a number of risks that could be as, if not more, consequential. Rising credit delinquencies suggest that consumers may struggle to keep the economic engine running. Japan and its growing inflation problem could trigger the next yen reverse carry trade, something we feel has been in progress since January. Regardless, we're encouraged by the fact that traditional risk-on/risk-off behavior is returning.

Fund Facts (As of 03/31/25)

| Share Class | Investor | Institutional |
|--------------------------------|------------|---------------|
| Ticker | ATACX | ATCIX |
| Total Fund Assets | \$ 12.22 M | \$ 38.35 M |

Performance

(Average Annual Total Return As of 3/31/2025)

| Time Period | YTD | 1 Yr | 3 Yr | 5 Yr | Since Inception Annualized* |
|--------------------------|-------|-------|--------|-------|-----------------------------|
| ATAC Rotation Fund inst. | 2.13% | 6.50% | -3.76% | 2.01% | 3.37% |
| ATAC Rotation Fund Inv. | 2.07% | 6.24% | -4.00% | 1.76% | 4.78% |

*Performance shown for the periods prior to the inception of the Institutional Class is based on the performance for the Investor Class shares, adjusted for the lower expenses applicable to the Institutional Class.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-855-ATACFUND. Time periods over one year are annualized unless noted otherwise.

The institutional share class gross expense ratio is 2.21% and net expense ratio is 1.72%. The investor share class gross expense ratio is 2.46% and net expense ratio is 1.97%. The Advisor has contractually agreed to waive a portion or all of its management fees and reimburse Fund expenses, in order to ensure that Total Annual Fund Operating Expenses (excluding AFE, leverage/borrowing interest, interest expense, taxes, brokerage commissions and extraordinary expenses) do not exceed 1.74% of the average daily net assets of the Fund's Investor Class shares and do not exceed 1.49% of the average daily net assets of the Fund's Institutional Class shares through December 29, 2025. The net expense ratio was applicable to investors.

Important Risk Disclosure For The ATAC Rotation Fund

Correlation is a statistical measure of how two securities move in relation to each other. The S&P 500 Index is a broad basedunmanaged index of 500 stocks, which is widely recognized as representative of equity market in general. Russell 2000 is an indexmeasuring the performance approximately 2,000 small-cap companies. MSCI Emerging Markets Index is an index created byMorgan Stanley Capital International (MSCI) that is designed to measure equity market performance in global emerging markets.The S&P US Treasury Bond Index 1 to 3 Year is a rules-based market-value weighted index engineered to measure the fixed-rate local currency securities publically issues by the United States which includes bonds maturing in 1 to 3 years. The S&P US Treasury Bond Index 7-10 Year is a rules-based market-value weighted index engineered to measure the fixed-rate local currency securities publically issues by the United States which includes bonds maturing in 7-10 years. The Lipper Flexible Portfolio Fund Index is an equal dollar weighted index of the largest mutual funds within the Flexible Portfolio fund classification, as defined by Lipper. You cannot invest directly in an index.

Absolute return strategies are not intended to outperform stocks and bonds during strong market rallies.

Mutual fund investing involves risk. Principal loss is possible. Because the Fund invests primarily in ETFs, it may invest a greater percentage of its assets in the securities of a single issuer and therefore is considered non-diversified. If a Fund invests a greater percentage of its assets in the securities of a single issuer, its value may decline to a greater degree than if the fund held were a more diversified mutual fund. The fund is expected to have a high portfolio turnover ratio which has the potential to result in the realization by the Fund and distribution to shareholders of a greater amount of capital gains. This means that investors will be likely to have a higher tax liability. Because the Fund invests in Underlying ETFs an investor will indirectly bear the principal risks of the Underlying ETFs, including but not limited to, risks associated with investments in ETFs, large and smaller companies, real estate investment trusts, foreign securities, non-diversification, high yield bonds, fixed income investments, derivatives, leverage,short sales and commodities. The Fund will bear its share of the fees and expenses of the underlying funds. Shareholders will pay higher expenses than would be the case if making direct investments in the underlying funds.

The Fund's investment objectives, risks, charges, expenses and other information are described in the statutory or summary prospectus, which must be read and considered carefully before investing. You may download the statutory or summary prospectus or obtain a hard copy by calling 855-ATACFUND or visiting www.atacfund.com. Please read the Prospectuses carefully before you invest.
